

Kawasaki Teryx Rear Bumper

P/N 10033-EMP

Includes:

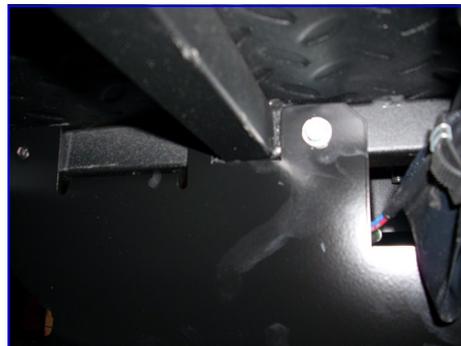

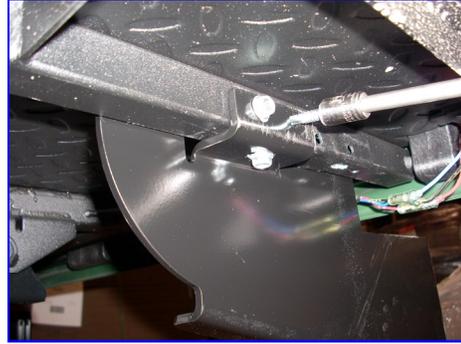

1. (2) mounting brackets (LH & RH)
2. (1) Rear Bumper
3. (4) 3/8-16x1" Black Carriage Bolts
4. (4) 3/8 USS Flat Washers
5. (4) #8 Nylon Nuts
6. (10) #14x 3/4 Tek Screws

Tools you will need:

1. 3/8" Socket Wrench
2. Cordless Drill with nut driver

Installation Instructions:

1. Apply Parking brake or chock wheels.
2. Using your drill with the nut driver and the TEK screws attach the brackets to the tube under the cargo bed. The flanges on the back will point towards the each other. If it helps you can mount the brackets to the bumper and hold it in place to get a better visual of it mounted. It may help to tilt the bed when driving the screws in.
3. Mount the bumper to the brackets using the 3/8" Carriage bolts, washers, and Nylon nuts.

Warning: This bumper was designed to protect the vehicle only and not the driver and/or passenger. The bumper should not be used for a tow strap or a tie down strap. The bed could flip up causing serious injury or death. Alcohol and/or drugs should never be used while operating a motor vehicle.
