13. (1) Logo Sticker

Tools Needed:

1. Phillips Screwdriver
2. 7/16" Wrench
3. Allen wrench

Installation should be done by a certified technician. Set the parking brake before doing anything.

Installation:

1. Inspect parts for damage from shipping. Once, the product has been installed it can not be returned.
2. Slide the edge trim over the top and bottom edges. The 41" goes on the top and the 52" goes on the bottom.
3. Remove the stock hood and set aside.
4. Put the rubber coated straps around the bottom of the cage.
5. With the help of a friend set the windshield frame into place.
6. Using the brackets and 1-3/4" long screws and nylon nuts attach the top to the cage gusset on the stock cage. Attach the other end of the bracket to the windshield frame with the 3/4" long screws and nylon nuts. Do not tighten yet.
7. Using the remaining 1-1/4" screws, nylon nuts and large fender washers attach the bottom to the rubber straps. The large washers will go on the outside. Do not tighten yet.
8. Once everything is on place tighten all the hardware and slide the rubber screw caps over the two screws on the bottom.
9. Slide the one end of each vent into the slot in the frame and screw the thumbscrews over the studs holding the vents in place.
10. Follow the instructions on the hand wiper for installation procedure.
